

Overall result: 47/100 - Medium claim risk. The main exposure comes from broad climate, certification and generic environmental wording. No negative external signal was retained; entity context is elevated because of sector exposure and complex supply chains.

Entity resolution: “Puratos” was matched to www.puratos.com. Confirm the entity before relying on the result.

ENTITY CONTEXT

High

High

Sector exposure is high; no retained negative public-source signal.

TOP RISK DRIVERS

#	Claim area	Flagged wording	Source
1	Climate-neutrality or offsetting claim	carbon neutral	www.puratos.com
2	Sustainability label / certification claim	certified sustainable	Puratos 2025 Sustainability GRI Report
3	Generic environmental claim	more sustainable	www.puratos.com

MOST MATERIAL FINDING

Climate-neutrality or offsetting claim

HIGH

Source: www.puratos.com

Puratos marks major sustainability milestone with carbon neutral operations.

Why it matters

The wording implies a neutral climate impact. The scan did not identify sufficiently proximate information on scope, methodology, residual emissions or the role of offsets.

Evidence needed

Operational boundary · Scopes covered · Baseline · Reduction pathway · Residual emissions · Offset use · Progress indicators

Recommended wording

Separate actual emission reductions from offsetting. State the operational scope, baseline, methodology, remaining emissions and progress achieved.

PRIORITY CLAIMS 2-3

Sustainability label / certification claim

HIGH

Source: Puratos 2025 Sustainability GRI Report

“...Cacao-Trace, our own **certified sustainable** cocoa sourcing program.”

Why it matters

The wording may be read as a certification statement, but the scheme owner, criteria, verifier, audit basis and validity are not stated next to the claim.

Evidence gap

Scheme owner · Public criteria · Independent verifier · Audit scope · Validity period

Recommended wording

Name the scheme, owner, applicable criteria, independent verification body, scope and validity period. Where no qualifying certification exists, avoid presenting the wording as a certification claim.

Generic environmental claim

HIGH

Source: www.puratos.com

“...creating nutritious and **more sustainable** breads...”

Why it matters

“More sustainable” is comparative but does not identify the environmental attribute, comparator, baseline, method or limitations.

Evidence gap

Attribute · Product scope · Comparator · Baseline · Method · Reporting period · Limitations

Recommended wording

Specify the exact improvement and comparator, for example the percentage reduction in a defined impact indicator versus a named baseline product and period.

PRIORITY ACTIONS

- | | |
|---|---|
| 1 | Review client-facing green claims
Identify every consumer-facing use of climate-neutrality, certification and generic sustainability wording. Confirm audience, channel and EmpCo relevance. |
| 2 | Strengthen claim-specific evidence
Create a concise evidence pack for each priority claim, including scope, methodology, data period, limitations, assurance and approval owner. |
| 3 | Implement claim governance
Record approved wording, source, evidence link, owner, legal/compliance review, publication date and next review deadline in a claims register. |

EXTERNAL SIGNALS

No negative external public-source signal was retained for Puratos in this scan. This does not confirm the absence of relevant controversies.

COVERAGE

- Coverage: 2 pages across 1 domain

METHODOLOGY SNAPSHOT

Risk bands: 0-44 Low · 45-74 Medium · 75-89 High · 90-100 Very high.
Lenses: EmpCo / Directive (EU) 2024/825 for consumer-facing green claims; Regulation (EU) 2024/3015 for forced-labour and supply-chain wording.
Use: First-pass screening only; see the full methodology for scoring, gating and limitations.

CONFIDENCE

Medium. The main company page and one company report were reviewed. Claim-level signals were detected. External-source results require manual verification.
