--	---	--	--

Executive summary

Company reviewed receives a global sustainability scan score of 60/100 for the uploaded internal document. Green risk: 65/100 (Consumer-facing EmpCo-relevant material: Potential greenwashing concern - not enough contradiction evidence for High). Social risk: 54/100 (Potential social-washing concern - evidence review needed).

Green claim red flags

- Generic environmental claim detected. Problematic trigger(s): eco, sustainable, generic environmental claim. Source: Uploaded internal document: final_check.txt.
- Potential EmpCo blacklisted-practice indicator if the generic claim is not clearly specified on the same medium and not backed by recognised excellent environmental performance.
- Climate-neutrality or offsetting claim detected. Problematic trigger(s): carbon neutral, offset, offsetting, recyclable, fully. Source: Uploaded internal document: final_check.txt.
- High-priority EmpCo blacklisted-practice indicator where product-level neutral/reduced/positive climate impact is based on offsetting.

Social claim red flags

- Supply-chain or supplier-responsibility claim detected. Source: Uploaded internal document: final_check.txt. Evidence should cover scope, KPIs, limitations and remedy/traceability where relevant.
- Supplier-responsibility / sourcing claim detected. Source: Uploaded internal document: final_check.txt. Evidence should cover scope, KPIs, limitations and remedy/traceability where relevant.

Key green claim signals retained

Generic environmental claim Source: final_check.txt Acme Corp is proud to offer eco-friendly, sustainable products across our entire range. Trigger: Pattern-based signal · Substantiation in passage: Likely insufficient	High
Climate-neutrality or offsetting claim Source: final_check.txt Our packaging is fully recyclable and our products are carbon neutral thanks to our offsetting programme. Trigger: Pattern-based signal · Substantiation in passage: Partly specified	High
Absolute or purity environmental wording Source: final_check.txt Our packaging is fully recyclable and our products are carbon neutral thanks to our offsetting programme. Trigger: Pattern-based signal · Substantiation in passage: Partly specified	High

Key social claim signals retained

Supply-chain or supplier-responsibility claim Source: final_check.txt We work with ethical sourcing partners worldwide. Trigger: Pattern-based signal · Substantiation in passage: Likely insufficient	High
Supplier-responsibility / sourcing claim Source: final_check.txt We work with ethical sourcing partners worldwide. Trigger: Pattern-based signal · Substantiation in passage: Likely insufficient	High

Recommended actions 1. Review client-facing green claims under EmpCo Check the exact wording the company uses for the detected green claim areas (Generic environmental claim; Climate-neutrality or offsetting claim; Absolute or purity... 2. Validate forced-labour and supplier claims For the company's supplier, responsible-sourcing, modern-slavery or forced-labour wording, prepare evidence on product/supplier traceability, risk assessment by... 3. Build a claim evidence file Create one evidence file per priority claim retained in this scan, with the approved wording, source URL/document, owner, evidence link, date, legal/compliance review... 4. Clarify climate and offset claims Separate the company's actual emission reductions from offsetting/compensation, and disclose scopes, baseline, residual emissions, implementation plan and progress indicators.

Score interpretation		Methodology note Claim wording (42%) + Evidence gap (24%) + External context (22%) + Sector/channel (12%) = 84/100 2024/825, "Empowering Consumers for the Green Transition" — for green claims, a forced-labour and supply-chain claims.
Score range	Meaning	
0–44 Low	No material problematic claim or limited wording risk.	
45–74 Medium	Some claim signals, wording risk or evidence gaps for review.	
75–89 High	Strong wording risk, evidence gaps or negative external signals.	
90–100 Very high	Multiple severe signals with regulatory or external context.
