

Company claim-risk report

EmpCo · EU Green Claims Directive · EU Forced Labour Regulation · EUDR

Uploaded internal document: test_doc.txt
2026-07-02

GLOBAL RISK SCORE 43 _{/100} Low	GREEN RISK SCORE 66 _{/100} Medium	SOCIAL RISK SCORE 12 _{/100} Low	OVERALL RISK LEVEL Low Combined green + social
---	---	---	---

Executive summary

Company reviewed receives a global sustainability scan score of 43/100 for the uploaded internal document. Green risk: 66/100 (Consumer-facing EmpCo-relevant material: Potential greenwashing concern - not enough contradiction evidence for High). Social risk: 12/100 (Low substantiation risk).

Green claim red flags

- Generic environmental claim detected. Problematic trigger(s): eco, climate neutral, 100%, generic environmental claim. Source: Uploaded internal document: test doc.txt.
- Potential EmpCo blacklisted-practice indicator if the generic claim is not clearly specified on the same medium and not backed by recognised excellent environmental performance.
- Climate-neutrality or offsetting claim detected. Problematic trigger(s): sustainable, carbon neutral, climate-neutrality or offsetting claim. Source: Uploaded internal document: test doc.txt.
- High-priority EmpCo blacklisted-practice indicator where product-level neutral/reduced/positive climate impact is based on offsetting.

Social claim red flags

- No separate social red flag was retained beyond normal evidence and wording review.

Key green claim signals retained

Generic environmental claim Source: test_doc.txt We are proud to be climate neutral by 2030 and our products are 100% eco-friendly and sustainably sourced. Trigger: Pattern-based signal	High
Climate-neutrality or offsetting claim Source: test_doc.txt Our company is committed to a sustainable, carbon neutral future. Trigger: Pattern-based signal	High
Future environmental-performance claim Source: test_doc.txt We are proud to be climate neutral by 2030 and our products are 100% eco-friendly and sustainably sourced. Trigger: Pattern-based signal	High

Key social claim signals retained

No material problematic claim signal retained.

Recommended actions 1. Review client-facing green claims under EmpCo Check the exact wording of the detected green claim areas (Generic environmental claim; Climate-neutrality or offsetting claim; Future environmental-performance claim; No... 2. Build a claim evidence file Create one evidence file per priority claim with the approved wording, source URL/document, owner, evidence link, date, legal/compliance review status and review deadline. 3. Clarify climate and offset claims Separate actual emission reductions from offsetting/compensation, and disclose scopes, baseline, residual emissions, implementation plan and progress indicators. 4. Align reporting and marketing language Use sustainability and annual reports as supporting evidence, but avoid copying broad report language into consumer-facing pages unless the claim is specific, current,...
--

Score interpretation	
Score range	Meaning
0–44 Low	No material problematic claim or limited wording risk.
45–74 Medium	Some claim signals, wording risk or evidence gaps for review.
75–89 High	Strong wording risk, evidence gaps or negative external signals.
90–100 Very high	Multiple severe signals with regulatory or external context.

Methodology note

Claim wording (42%) + Evidence gap (24%) + External context (22%) + Directive • EU Forced Labour Regulation (EU) 2024/3015 • EUDR. CSD 2026/470, in force 18 March 2026).
