TOP RISK DRIVERS

#	CLAIM AREA	FLAGGED WORDING	SOURCE
1	Future environmental-performance claim with a deliberately. Very high	net zero by 2030	Sustainability report
2	Absolute or purity environmental wording High	zero waste	Corporate website
3	Generic environmental claim High	more sustainable	Product page

MOST MATERIAL FINDING

Very high Future environmental-performance claim with a deliberately long heading to test wrapping Source: Sustainability report Acme Fashion will be net zero by 2030 through a comprehensive transition programme. WHY IT MATTERS The future claim requires a public, measurable and verifiable implementation plan. RECOMMENDED IMPROVEMENT Publish measurable milestones, resources, governance, verification and limitations.	EVIDENCE GAP scope; baseline; milestones; resources; verification
COVERAGE AND CONFIDENCE 3 page(s) across 2 domain(s) · Medium several company pages were reviewed. external public-source search was active. claim-level signals were detected.	REGULATORY LENS EmpCo for consumer-facing environmental and selected social claims; Forced Labour Regulation as the forced-labour and supply-chain assurance lens.

ADDITIONAL MATERIAL FINDINGS

High	Absolute or purity environmental wording Source: Corporate website All operations are zero waste . WHY IT MATTERS Absolute wording creates a high evidence burden. RECOMMENDED IMPROVEMENT Qualify the scope and disclose the method and limitations.	EVIDENCE GAP scope; methodology; reporting period
High	Generic environmental claim Source: Product page Our products are more sustainable . WHY IT MATTERS The environmental attribute and baseline are unclear. RECOMMENDED IMPROVEMENT Specify the exact attribute, baseline and evidence.	EVIDENCE GAP attribute; baseline; method

EXTERNAL PUBLIC-SOURCE SIGNALS

Negative external stakeholder signals only. Positive, neutral and company-owned sources are excluded. Automated retained signals require manual verification of status, entity link and claim relevance.

No negative external public-source signal was retained. If external search was unavailable, this does not confirm an absence of relevant criticism or enforcement.

PRIORITY ACTIONS

1	Review claims Review all consumer-facing claims.
2	Build evidence files Create one evidence file per claim with approved wording, source, owner, evidence link, review status and next review date.
3	Implement governance Add approval controls.
