GLOBAL RISK SCORE 60/100 Medium	GREEN RISK SCORE 65/100 Medium	SOCIAL RISK SCORE 54/100 Medium	OVERALL RISK LEVEL Medium Combined green + social
--	---	--	--

Executive summary

Acme Corp scores **60/100** overall (**Medium** claim-risk) on this scan. Green score is 65/100 (medium risk), mainly because of the wording of the claims themselves (84/100). Claim types retained: Generic environmental claim, Climate-neutrality or offsetting claim, Absolute or purity environmental wording. This is client/consumer-facing material, which increases EmpCo relevance. Social score is 54/100 (medium risk), mainly because of a lack of visible evidence/substantiation (94/100). Claim types retained: Supply-chain or supplier-responsibility claim, Supplier-responsibility / sourcing claim. Forced-labour or product/supply-chain wording receives higher regulatory weight where relevant.

All claim signals below are from: final.txt

Green claims — at a glance

- Generic environmental claim
- Climate-neutrality or offsetting claim
- Absolute or purity environmental wording

Social claims — at a glance

- Supply-chain or supplier-responsibility claim
- Supplier-responsibility / sourcing claim

Evidence, external signals & action plan — Score drivers and recommended next steps

Why the green score is what it is

Green score is 65/100 (medium risk), mainly because of the wording of the claims themselves (84/100). Claim types retained: Generic environmental claim, Climate-neutrality or offsetting claim, Absolute or purity environmental wording. This is client/consumer-facing material, which increases EmpCo relevance.

- Claim types detected: Generic environmental claim, Climate-neutrality or offsetting claim, Absolute or purity environmental wording.
- Strongest driver: the wording of the claims themselves (84/100).
- Evidence-gap level: 80/100.
- External green signals retained after company-owned-source filtering: 0.
- Sector exposure for environmental claims: Medium.

Why the social score is what it is

Social score is 54/100 (medium risk), mainly because of a lack of visible evidence/substantiation (94/100). Claim types retained: Supply-chain or supplier-responsibility claim, Supplier-responsibility / sourcing claim. Forced-labour or product/supply-chain wording receives higher regulatory weight where relevant.

- Claim types detected: Supply-chain or supplier-responsibility claim, Supplier-responsibility / sourcing claim.
- Strongest driver: a lack of visible evidence/substantiation (94/100).
- Evidence-gap level: 94/100.
- External social signals retained after company-owned-source filtering: 0.
- Sector exposure for social claims: Medium.

Negative external stakeholder signals retained

No negative external stakeholder signal retained for Acme Corp, or external search not configured.

Recommended actions for Acme Corp

1. Review client-facing green claims under EmpCo

Check the exact wording Acme Corp uses for the detected green claim areas (Generic environmental claim; Climate-neutrality or offsetting claim; Absolute or purity environmental...)

2. Validate forced-labour and supplier claims

For Acme Corp's supplier, responsible-sourcing, modern-slavery or forced-labour wording, prepare evidence on product/supplier traceability, risk assessment by geography/product,...

3. Build a claim evidence file

Create one evidence file per priority claim retained in this scan, with the approved wording, source URL/document, owner, evidence link, date, legal/compliance review status and...

4. Clarify climate and offset claims

Separate Acme Corp's actual emission reductions from offsetting/compensation, and disclose scopes, baseline, residual emissions, implementation plan and progress indicators.

Score interpretation

Score range	Meaning
0–44 Low	No material problematic claim or limited wording risk.
45–74 Medium	Some claim signals, wording risk or evidence gaps for review.
75–89 High	Strong wording risk, evidence gaps or negative external signals.
90–100 Very high	Multiple severe signals with regulatory or external context.

Methodology note

Claim wording (42%) + Evidence gap (24%) + External context (22%) + Sector/channel sensitivity (12%). Lenses: EmpCo — Directive (EU) 2024/825, "Empowering Consumers for the Green Transition" — for green claims, and the EU Forced Labour Regulation (EU) 2024/3015 for forced-labour and supply-chain claims.
