ENTITY CONTEXT

High
Ten relevant external signals were retained.

DATA RELIABILITY

4 reviewed pages required a public text-extraction fallback. A low risk score from this scan may reflect limited access to the site's content, not necessarily a genuine absence of risky claims.

TOP RISK DRIVERS

#	CLAIM AREA	FLAGGED WORDING	SOURCE
1	Future environmental-performance claim with an exceptionally. Very high	decarbonization roadmap	2023 sustainability and social impact report
2	Absolute or purity environmental wording High	zero waste	2023 sustainability and social impact report
3	Generic environmental claim High	more sustainable	2024 sustainability and social impact report

MOST MATERIAL FINDING

Very high

Future environmental-performance claim with an exceptionally long title that previously pushed the risk label outside the right-hand border

Source: 2023 sustainability and social impact report

We are developing a comprehensive **decarbonization roadmap** which will chart out a pathway to achieve our near-term target to reduce emissions by 25% by 2030.

WHY IT MATTERS

This future environmental-performance claim requires a detailed, measurable and verifiable implementation plan.

EVIDENCE GAP

scope of the claim; specific environmental attribute; reporting period; methodology; limitations and exclusions

RECOMMENDED IMPROVEMENT Add a public implementation plan, milestones, resources, governance, progress indicators, verification basis and scope limitations.

COVERAGE AND CONFIDENCE

4 page(s) across 2 domain(s) · Medium
several company pages were reviewed. external public-source search was active. claim-level signals were detected.

REGULATORY LENS

EmpCo for consumer-facing environmental and selected social claims; Forced Labour Regulation as the forced-labour and supply-chain assurance lens.

ADDITIONAL MATERIAL FINDINGS

High Absolute or purity environmental wording

Source: 2023 sustainability and social impact report

Two of these facilities obtained **Zero Waste** to Landfill certification, independently assured by TÜV Rheinland.

WHY IT MATTERS

Absolute wording creates a high evidence burden.

EVIDENCE GAP

scope; methodology; reporting period

RECOMMENDED IMPROVEMENT Qualify the claim and specify exact scope, conditions, test method, limitations and evidence.

High Generic environmental claim

Source: 2024 sustainability and social impact report

SHEIN and Lufthansa Cargo sign an MoU to promote **more sustainable** air transportation.

WHY IT MATTERS

The environmental attribute and baseline are unclear.

EVIDENCE GAP

attribute; baseline; method

RECOMMENDED IMPROVEMENT Specify the exact attribute, baseline and evidence.

EXTERNAL PUBLIC-SOURCE SIGNALS

Negative external stakeholder signals only. Positive, neutral and company-owned sources are excluded. Automated retained signals require manual verification of status, entity link and claim relevance.

No negative external public-source signal was retained. If external search was unavailable, this does not confirm an absence of relevant criticism or enforcement.

PRIORITY ACTIONS

1	Review client-facing green claims under EmpCo Review exact consumer-facing wording and confirm scope, methodology, evidence, verification basis and limitations before reuse.
2	Build a claim evidence file Create one evidence file per claim with approved wording, source, owner, evidence link, review status and next review date.
3	Align reporting and marketing language Add approval controls.
