One external signal was retained.

DATA RELIABILITY

1 reviewed page(s) returned unusually little text. A low risk score from this scan may reflect limited access to the site's content, not necessarily a genuine absence of risky claims.

TOP RISK DRIVERS

| # | CLAIM AREA                                     | FLAGGED WORDING      | SOURCE         |
|---|------------------------------------------------|----------------------|----------------|
| 1 | Future environmental-performance claim<br>High | net zero by 2030     | sustainability |
| 2 | Supply-chain responsibility claim<br>High      | responsible sourcing | sustainability |

MOST MATERIAL FINDING

High

Future environmental-performance claim

Source: sustainability

We will become **net zero by 2030** across our operations.

WHY IT MATTERS

A future claim requires a public implementation plan and regular verification.

EVIDENCE GAP

scope; baseline; milestones; resources; verification

**RECOMMENDED IMPROVEMENT** Publish a detailed plan with scope, baseline, milestones, resources, progress and verification.

COVERAGE AND CONFIDENCE

3 page(s) across 1 domain(s) · Medium

three sources were reviewed. one page returned limited text. external search was active.

REGULATORY LENS

EmpCo for consumer-facing environmental and selected social claims; Forced Labour Regulation as the forced-labour and supply-chain assurance lens.

ADDITIONAL MATERIAL FINDINGS

High Supply-chain responsibility claim

Source: sustainability

Our **responsible sourcing** programme protects workers throughout the supply chain.

WHY IT MATTERS

The wording may imply broad supply-chain control.

EVIDENCE GAP

supplier tiers; audit method; worker voice; remediation

**RECOMMENDED IMPROVEMENT** State covered supplier tiers, assessment method, findings, limitations and remediation.

EXTERNAL PUBLIC-SOURCE SIGNALS

Negative external stakeholder signals only. Positive, neutral and company-owned sources are excluded. Automated retained signals require manual verification of status, entity link and claim relevance.

Regulator reviews environmental claims

Public authority · 2026-06-01

Investigation / regulatory review · Retained - manual verification required

The regulator is reviewing environmental claims made by Example Group.
